

14 Herbert St

Gulgong NSW 2852

### **Environmental Impact on removing existing carport with lean to shed and erect a Garage**

Dwelling to be removed is rusty and replacing with garage in pale eucalypt will be aesthetically pleasing and suit surrounds

Garage will be at back of housing block at rear Dewars lane.

Six maps or google earth show greenery at back fence that was not there when bought house. There are no trees on site. So no removal or pruning is required.

Current shed and carport has no gutters garage will have gutters

the front of carport currently is part of neighbours fence the garage will be moved to sit parallel to existing shed.

Dewars lane has an assortment of garage styles colours some on border some set back

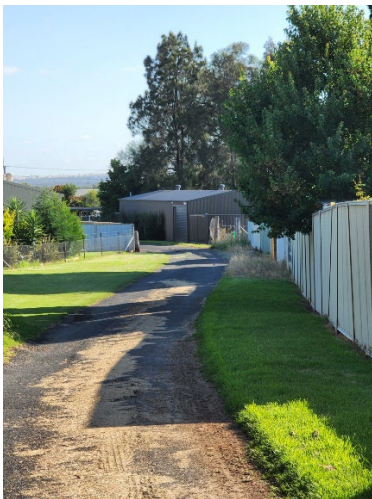

To summarise the replacement of car port to garage will not have any impact on the environment

Replacing this with new Garage

fence line on lane
