LIQUID TRADE WASTE APPLICATION FORM CLASSIFICATION B & C MECHANICAL

Form C1 (Page 1)

This application form is for businesses that wish to discharge liquid trade waste to Midwestern Regional Council sewerage system (Classification B, C).

• Complete all pages in this Form for Concurrence Classification B or C.

Please include all details as requested. When completed, please lodge this form with the Council, along with attachments (as appropriate from Forms C2 to C6).

1.	Business trading name:					
2.	Site address:	No	Street			
	Town/Suburb				_ Postcode _	
	Property description:	Lot	Section		_ DP	
3.	Property owner's name:			Telephone:	ВН	
					AH	
4.	Property owner's address	ss:				
5.	Applicant's name:			Telephone:	BH	
	(if different to the owner)				AH	
6.	Applicant's address:					
7.	Occupier's name:			Telephone:	вн	
	(if different to the owner)				AH	
8.	Normal hours of busines	ss:				
	Monday to Friday:		am / pm to	am	/ pm	
	Saturday:		am / pm to	am	/ pm	
	Sunday:		am / pm to	am	/ pm	
9.	Type of business:					
	Commercial retail food p	reparation ac	tivities – Please fil	l out and attach	Form C2	
	Other commercial activit	ies – Please f	ill out and attach a	as appropriate fi	om Forms C	3 to C5
10). Description of flow:					
	Maximum rate of discha	rge to sewer				kL/h or L/s
	Maximum daily discharg	e to sewer				kL/ day

Form C1 (Page 3)

The following substances are prohibited from being discharged to the sewerage system:

- organochlorine weedicides, fungicides, pesticides, herbicides and substances of a similar nature and/or wastes arising from the preparation of these substances
- organophosphorus pesticides and/or waste arising from the preparation of these substances
- any substances liable to produce noxious or poisonous vapours in the sewerage system
- organic solvents and mineral oil
- any flammable or explosive substances
- discharges from 'Bulk Fuel Depots'
- · chromate from cooling towers
- natural or synthetic resins, plastic monomers, synthetic adhesives, rubber and plastic emulsions
- rain, surface, seepage or subsoil water, unless specifically permitted
- solid matter
- any substance assessed as not suitable to be discharged to the sewerage system
- waste liquids that contain pollutants at concentrations which inhibit the sewage treatment process refer Australian Sewage Quality Management Guidelines, June 2012, WSAA

any other substances listed in a relevant regulation.

Adopted Date: 1 July 2017 Review Date: 1 July 2018 Page 3 of 13 Doc number: WAS004 Version No: 1.0

Concurrence Classification B or C (Page 4)

The following pages are to be used by businesses that wish to discharge Concurrence Classification B or C liquid trade wastes to the sewerage system.

Please include all details as requested (if insufficient space attach as clearly labelled appendices), and make sure

- 18. Type and Quantity of raw materials processed.
- 19. Description of Waste:
 - List of all expected pollutants including substances contained in wash down detergents, boiler and cooling water and other sources
 - Expected maximum and average concentrations of pollutants
 - Sample analysis results of the proposed waste. Where required.

Note: The sample analysis tests shall be carried out by a NATA approved laboratory with accreditation for analysis of the nominated pollutants in the application or a laboratory acceptable to NSW Office of Water.

Acceptable means of sample analysis data collection:

- Sample analysis results from a similar existing process
- Collection of the proposed waste from a trial pre-treatment plant
- Stand alone pre-treatment manufacturer's waste quality expectations
- Configured pre-treatment consultant's calculations based on experience of a similar installation.

Adopted Date: 1 July 2017 Review Date: 1 July 2018 Page 4 of 13 Doc number: WAS004 Version No: 1.0

Please attach details and supporting documentation of data collection method.

When detailing the nominated pollutants where there is no possibility of discharge to the sewerage system because none of the substance is stored or used at the premises, write "NIL".

(the local water utility may add to this list as required)

Parameter	Acceptance Guideline Limits ⁺ mg/L	Average mg/L	Maximum mg/L
BOD ₅ and Suspended solids	Normally, approved at 300 mg/L each. Concentration up to 600mg/L and in some cases higher concentration for low mass loadings may be acceptable if the treatment works has sufficient capacity and odour will not be a problem.		
COD	Normally, not to exceed BOD_5 by more than three times. This ratio is given as a guide only to prevent the discharge of non-biodegradable waste.		
Total dissolved solids	Up to 4000 mg/L may be accepted. The acceptance limit may vary depending on an effluent disposal option and is subject to a mass load limit.		
Temperature	Temperature Less than 38°C.		
pH	Within the range 7.0 to 9.0.		
Oil and grease	100 mg/L if the volume of the discharge does not exceed 10% of the design capacity of the treatment works, and 50 mg/L if the volume is greater than 10%.		
Detergents	All industrial detergents are to be biodegradable. A limit on the concentration of 50 mg/L (as MBAS) may be imposed on large liquid trade wastes.		
Colour	No visible colour when the waste is diluted to the equivalent dilution afforded by domestic sewage flow.		
Radioactive substances	The discharge must comply with the Radiation Control Act 1990.		

⁺ Council may vary the acceptance limits having regard to the discharge characteristics and capacity of its sewerage system.

Adopted Date: 1 July 2017 Review Date: 1 July 2018 Page 5 of 13 Doc number: WAS004 Version No: 1.0

Acceptance guidelines for inorganic compounds+

Parameter	Acceptance Guideline Limits mg/L	Average mg/L	Maximum mg/L
Ammonia (as N)	50		
Boron	5		
Bromine	5		
Chlorine	10		
Cyanide	1		
Fluoride	20		
Nitrogen (total Kjeldahl)	100		
Phosphorus	20		
Sulphate (SO ₄)	500		
Sulphide (as S)	1		
Sulphite (as SO ₃)	15		

Acceptance guidelines for organic compounds+

Parameter	Acceptance Guideline Limits mg/L	Average mg/L	Maximum mg/L
Benzene	0.04		
Toluene	0.5		
Ethyl benzene	1		
Xylene	1		
Formaldehyde	30*		
* Acceptance of chemical toilet waste which contains formaldehyde will be assessed on the available dilution in the sewerage system.			
Phenolic compounds (except pentachlorophenol)	5		
Petroleum hydrocarbons (non-flammable)	30		
Pesticides (general)	0.1		
Pesticides (organophosphates)	Nil		
Pesticides (organochlorines)	Nil		
Polynuclear Aromatic Hydrocarbons (PAH)	5		

Council may vary the acceptance limits having regard to the discharge characteristics and capacity of its sewerage system.

Adopted Date: 1 July 2017 Review Date: 1 July 2018 Page 6 of 13 Doc number: WAS004 Version No: 1.0

Acceptance guideline for metals+

For small discharges, a daily mass load criteria may be used other than the concentration limit. An upper daily mass load can be applied to a large liquid trade waste discharge in addition to the concentration limit.

Parameter	Acceptance Guideline Limits mg/L	Allowed daily mass limit g/d	Average mg/L	Maximum mg/L
Aluminium	100	-		
Arsenic	1	2		
Cadmium	1	6		
Chromium *	3	15		
trivalent state (Cr3+)	hromium (Cr6+) is present in the p, prior to discharge into the sewer. corrosion inhibitors in cooling tow	Discharge of hexavalent	nt will be required to rechromium (Cr6+) from	educe it to the chromate
Cobalt	5	15

Selenium	1	15		
Silver	2#	6		
Tin	5	15		
Zinc	5	15		

Council may vary the acceptance limits having regard to the discharge characteristics and capacity of its sewerage system.

Adopted Date: 1 July 2017 Review Date: 1 July 2018 Page 7 of 13 Doc number: WAS004 Version No: 1.0

[#] This limit is applicable for large dischargers. The concentration of silver in the photo processing waste where a balancing tank is provided is not to exceed 5 mg/L.

20. Non sewerage system discharges/wastes

Details of management arrangement of waste streams/wastes that are not permitted or not intended to be discharged to the sewerage system.

21. Description of flow:

The maximum daily and instantaneous rate of discharge (kL/h or L/s) is set on the available capacity of the sewer. Large dischargers are required to provide a balancing tank to even out the load on the sewage treatment works.

Hours	of days during w	hich discharge	e will normally take place					
Monda	ay – Friday:	am	pm					
Saturd	urday:	am pm am pm	pm					
Sunda	y:		pm					
When	are the peak per	eriods of discharge during the day						
Туре	of discharge:							
	Batch flow							
	I Intermittent flo	W						
	Continuous flo	W						
	Where the applicant considers there are special circumstances applicable to their discharge, these circumstances should be identified, eg:							
•	Seasonal disch	arges						
•	Large differenc	es between av	verage and maximum daily loads					
•	Variations to flo	ow, which avoi	d peak domestic flows, etc.					
•	Retention of dis	scharges for ex	xtended periods.					
Comm	ents							
23. O	pen Areas (Pleas	se attach storn	mwater drainage plan for the site):					
Does t	he proposed insta	Illation contain	open areas that will drain to the sewerage system?					
	Yes /							
	No							
If Yes	give details:							

Adopted Date: 1 July 2017 Review Date: 1 July 2018 Page 8 of 13 Doc number: WAS004 Version No: 1.0

Stormwater is prohibited from being discharged into the council's sewerage system. The capacity for such flows is not provided in the sewerage system. Therefore, council does not generally accept the discharge of stormwater to the sewerage system.

The discharge of limited quantities of first flush water from sealed liquid trade waste generating areas will be considered where roofing cannot be provided because of safety or other important considerations.

Please provide the following information:

- reasons why the area cannot be fully or partially roofed and bunded to exclude stormwater
- the dimensions and a plan of the area under consideration
- whether the open area is sealed
- the estimated volume of the stormwater discharge
- information on rain gauging
- information on a first-flush system if proposed
- measures proposed for diverting stormwater away from the liquid trade waste generating area
- report on other stormwater management options considered and why they are not feasible.

24. Water supply source:

- bore/groundwater/on-site dam/watercourse
- recycled/reuse water
- town water
- any water supply meter being installed.

	Comments
25.	Sampling point location
26.	Flow measurement location and proposed flow measurement to sewer Please attach details of flow measurement installed/proposed

27. Existing/proposed waste treatment and equipment:

Plans - application to be accompanied by 2 copies of plans showing:

- details and location of all processes, tanks, pits and apparatus associated with the generation of industrial waste
- details of the proposed liquid waste treatment processes
- details of pipes, floor drainage used to convey the effluent
- a full schematic layout of the proposed/existing waste pre-treatment facilities for liquid trade waste prior to discharge to the sewerage system
- flow diagram and hydraulic profile of proposed treatment apparatus
- capacity/dimensions, material of construction and lining, operation and maintenance of all pits, tanks, dosing systems, pumps, etc
- Details of the integrity of the pH correction system (diversion system, recording, alarms location, failsafe, tamperproof)
- Any additional details as requested by the local water utility.

Adopted Date: 1 July 2017 Review Date: 1 July 2018 Page 9 of 13 Doc number: WAS004 Version No: 1.0

28. Proposed cleaning schedule of pre-treatment equipment and contractor Frequency Pre-treatment Equipment Name of Contractor Licence (weeks) 29. Details of the chemicals to be used on site: Storage Substance Qty Location **Bunding** liquid/solid NOTE: Attach Material Safety Data Sheets prepared in accordance with the National Code of Practice [NOHSC: 2011] for chemicals to be used and are likely to be contained in the waste effluent 30. Any proposed plans for future expansion? ☐ Yes □ No If "Yes" give details on a separate attachment.

Adopted Date: 1 July 2017 Review Date: 1 July 2018 Page 10 of 13 Doc number: WAS004 Version No: 1.0

Form C1 (Page 10)

Design Capacity (EP)

The applicant should be aware that approval of this application does not constitute a guarantee of any future approval of a variation to the approval. This will be dependent on the available capacity of the sewerage system at that time and any future approval must not be assumed.

Form C3 (Page 1)

Mechanical repairers application attachment sheet

Please fill out this attachment sheet if your business is involved in mechanical repair processes (and other services related to motorised equipment processes) that discharge liquid trade waste to the sewerage system. In the lists below, tick the 'business type' or 'processes' that best describe what your business does. Note that there is an additional list at the end for 'associated processes', e.g. Take-away food at a service station.

When finished, attached this sheet to the application form (Form C1).

Please tick box beside appropriate activity
Business Type
☐ Airport terminal
☐ Bus/coach depot
☐ Car detailer
☐ Car/truck dealership service centre
☐ Car importation premises (de-waxing only)
☐ Construction equipment maintenance (ie. earthmoving equipment and/or cranes)
☐ Equipment hire premises
☐ Fleet vehicle operations
☐ Forklift maintenance
☐ Garbage truck washing
☐ Lawnmower repairer
☐ Motorbike mechanical repairer
☐ Motor boat mechanical repairer
☐ Motor wrecker
☐ Service station
☐ Stand-alone mechanical workshop
☐ Train washing facility
☐ Transport depot
Other, please specify

Adopted Date: 1 July 2017 Review Date: 1 July 2018 Page 12 of 13 Doc number: WAS004 Version No: 1.0

Form C3 (Page 2)

Mechanical workshop ☐ Parts washing with water ☐ Floor washing ☐ Draining and flushing of radiator coolant (not permitted for discharge) ☐ Parts washing with solvents (not permitted for discharge) ☐ Radiator repairs ☐ Automobile dismantling (ie. motor wrecker) ☐ Cleaning of engine blocks and engine heads in chemical baths ☐ Engine/gearbox reconditioner (sent off site) ☐ Engine/gearbox reconditioner (carried out on site). Repairing car bodies ☐ Panel beating ☐ Wet rubbing ☐ Spray painting. Washing and detailing ☐ Tunnel type (external body only) ☐ Wand type (external body only) ☐ Washing by hand (external body only) ☐ Degreasing of engine and washing ☐ Internal washing of meat vans or truck underbodies ☐ External truck washing ☐ Internal washing of tankers ☐ Forecourt washing (service station) ☐ Open area washing (considered only under special circumstances. Applicant must supply reasons why roofing is not possible, and must include the details of a first flush system). Associated Activities/Businesses Some premises have associated processes generating liquid trade waste. In addition to the above, does your premises have any of the following processes? ☐ Restaurant (number of seats) ☐ Take-away food bar (number of seats) ☐ Service station forecourt food caravan(s) ☐ Boiler blowdown (steam supply for internal washing of tankers) ☐ Chemical toilet disposal (for intercity coaches/buses)

Adopted Date: 1 July 2017 Review Date: 1 July 2018 Page 13 of 13 Doc number: WAS004 Version No: 1.0

☐ Other trade wastewater process (please specify)
