

Item 6: Notices of Motion or Rescission

6.1 BMX Pump Track Investigation

NOTICE OF MOTION LISTED BY CR PAUL CAVALIER
TO 02 FEBRUARY 2022 ORDINARY MEETING
GOV400098, A0100035, GOV400022

MOTION

That Council:

- 1. provides in principle support for the construction of a BMX Pump Track in the Mid-Western Region; and**
- 2. investigates potential sites and costs for the construction of a BMX Pump Track across the entire region and brings a report back to Council.**

Background

There has been significant community interest in BMX Pump Tracks across our region, especially during the recent election period. On the face of it, these facilities appear to provide significant benefit for much lower cost than other projects undertaken by Council, and could provide an excellent recreational activity for locals and for people of all ages.

Other Councils appear to have been successful in obtaining grant funding to assist with the construction of these types of facilities, so it is anticipated that the cost of installing one will most likely be subsidised.

The intention in raising this notice of motion is to investigate viability and begin preliminary discussions around costs and potential sites for construction.

Officer's comments

Consideration has been given for the potential for a BMX pump track in the Glen Willow precinct. Information on this and other potential sites across the region can be included in the report back to Council.
