

Rural Water Fill Stations

Rural Water Fill Stations provide emergency potable water access for rural residents living in the Mid-Western region.

HOW TO ACCESS

To improve water access for rural residents, Council upgraded Rural Water Fill Stations in Mudgee, Gulgong and Rylstone. These fill stations provide more ensured potable water access for rural residents, faster flow rates and reduced fill times. Casual users and nomads can also extract water using the casual user feature at each standpipe.

The Rural Water Fill Stations have an outlet of either 25mm or a larger outlet of 50mm for higher flow rates. Registration is free to rural residents. Simply fill in the online form at midwestern.nsw.gov.au/ruralwaterfill

Once registered, residents with email will have access via the Smart City Control App (<https://app.smartcitycontrol.com.au/>) and those without email will receive a swipe card.

Water charges apply, per Council's Fees and Charges. Payments are processed via PayPal.

HAVEN'T REGISTERED YET?

Scan the QR code to complete your registration online.

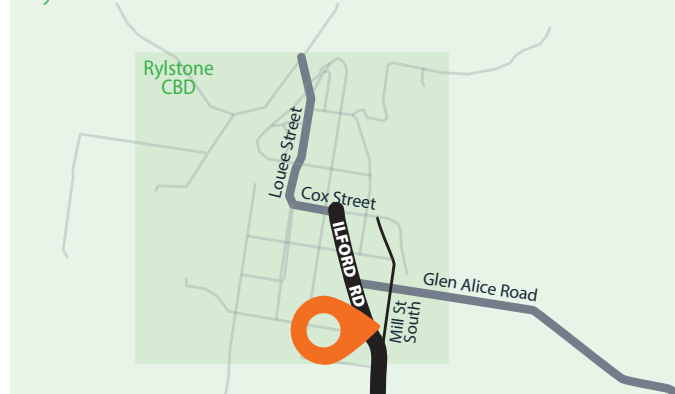

LOCATIONS

One fill point  Two fill points 

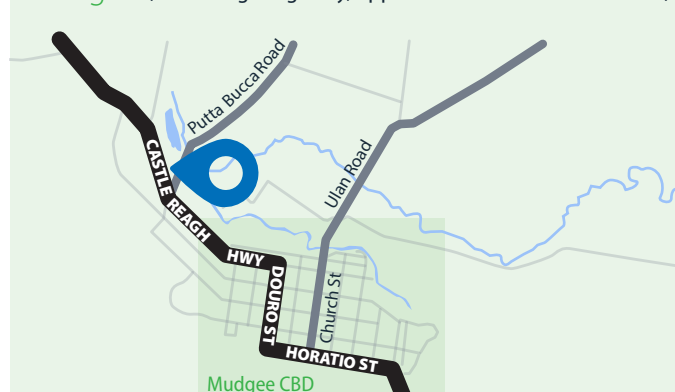

Gulgong (Corner of Saleyards Lane and Spring Creek Road)

Rylstone (Corner of Ilford Road and Mill Street South)

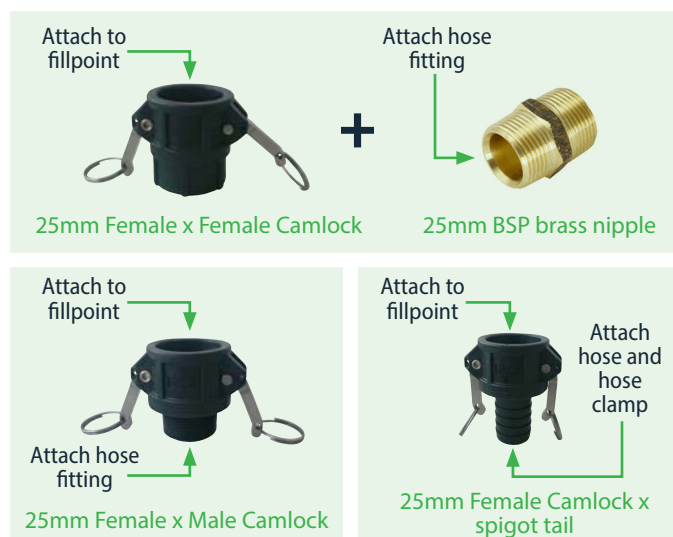

Mudgee (Castlereagh Highway, opposite Putta Bucca intersection)

WHAT YOU'LL NEED TO CONNECT

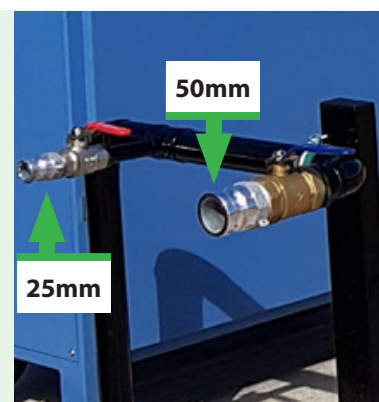

To use Rural Water Fill Stations, customers will need a connection suitable to match either 25mm or 50mm male camlock fitting. Camlock adapters can be sourced from hardware or plumbing stores, and connect to existing hoses used for the previous fill points.

TO FILL YOUR TANK

1. Connect

Securely connect one end of your hose to the Rural Water Fill Station either 50mm or 25mm Camlock coupling and the other end to the inlet on your tank.

2. Swipe

Swipe your access card, use the SmartCityControl app or scan the casual user QR code with your smartphone.

3. Select

Select the standpipe name, as displayed on the fill point. The light will flash slowly when accepted.

4. Open valve

Press the green button on the console and the valve will open. Ensure the gate valve by the connection point is also set to open.

5. Close valve

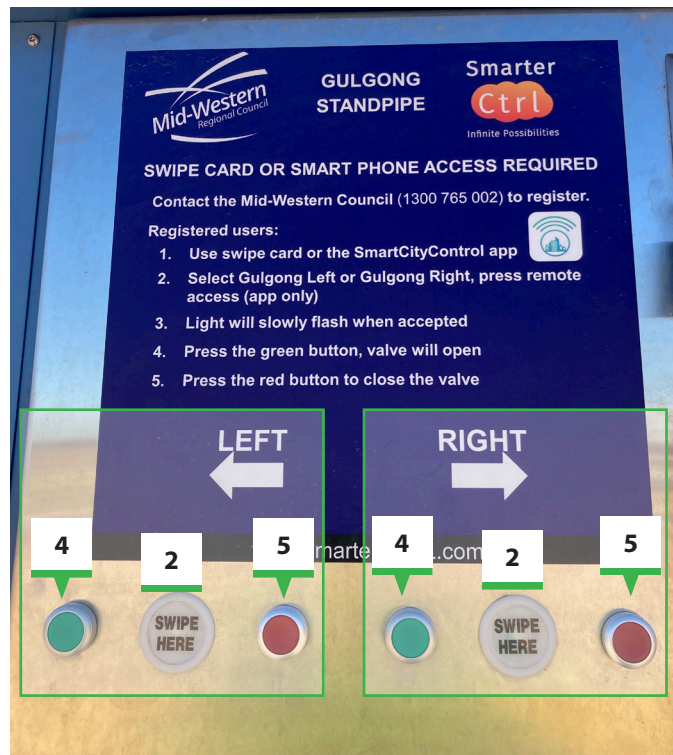

When filling is complete, be sure to press the red button to close the valve. This will log you out of your account and end the payment session with PayPal.

6. Disconnect

Disconnect all fittings from the fill station and your tank. Take care to avoid spillage.

7. Exit

Be aware of other vehicles or pedestrians and exit the fill point safely.
